

Technical data sheet

CLEAMEN 242

Volume: 1 l

Product code: VC242010096

Product description:

A liquid product intended for professional cleaning of waste pipes clogged with fats and grease. It is suitable for chrome-plated materials, stainless steel, ceramic and unsoftened PVC materials. Do not use on flexible plastic waste hoses. Do not use for purposes other than those for which it is intended. Apply directly from the bottle. Not suitable for aluminum and alkali-resistant materials.

Instruction of use:

The product must be poured directly into the drains. Avoid contact with the product and with sink, bath, or metal, etc. Pour the recommended amount of the product slowly and gradually into the drain and leave it to react as per the specified table. Then (after 15 to 30 minutes) rinse with large amounts of water. During handling, use protective rubber gloves, protect eyes and face with protective shield. Do not put your face above cleaned drains. When the product stops pouring out of the bottle, do not close it but place it in vertical position in order to allow the air to get inside. The product is not designed for periodic cleaning. However, it is possible to use half a dose once a week for preventative purposes. If the stuck location (drain block) is between the outlet and the siphon, such block must be mechanically removed prior to using CLEAMEN 242 drains alkaline. If this procedure is not observed accurately (i.e. slowly and gradually pour the specified dose only in the drains), the solution of the agent and water may potentially bubble back and damage the surface around the inlet, particularly coloured plastic materials and enamel! DO NOT POUR AROUND THE DRAIN! It is necessary that the drain pipes have sufficient outlet descent in order to prevent the product from remaining in the pipes.

dosage	dose in ml according to the size of the pipe		
	small pipe	kitchen drain	Toilettes and cleaning drains
dose (ml)	150	250	500
time (min.)	15	25	30

Physical and Chemical properties:

Form: Liquid
pH: 14
Colour: Colourless
Odour: characteristic

Instruction about storage:

> 5 °C < 25 °C. Protect against freeze.

Ingredients:

DANGER.

May be corrosive to metals. Causes severe skin burns and eye damage.
