Product description:

A highly concentrated foamless product for cleaning carpets, upholstery, car seats made from both natural and artificial fibres. It is designed for the extraction method of cleaning for all textiles - upholstery, carpets - resistant to wet cleaning process.

It is not suitable for cleaning any textile materials, which are non-resistant to wet processes especially hand woven and silky carpets.

Instruction of use:

Apply the diluted solution on the surface by means of the extractor depending on the levels of dirt. Apply undiluted product in order to pre-clean the stains. The surface must be thoroughly vacuumed prior to cleaning and whilst cleaning and then leave it for a short time and wash the textile with clean water. We recommend using anti-static agent Cleamen 132 – impregnator in order to prolong the cleaning effect, during the final stage of the cleaning process.

DILUTING:

Using 1 l bottle:

Always use specified personal hand protection equipment for work.

1. Prepare the bottle designed for diluting or bucket for preparing the solution.
2. Pour the specified amount of water in the bottle or bucket designed for diluting depending on the required volume of diluted solution.
3. Take the bottle with the concentrate and select required amount of the concentrate (use water gauge and volume scale on the bottle).
4. Pour the measured amount directly or by means of a funnel into the diluting vessel.
5. Apply the prepared diluted solution as per your selected technological procedure.
