

Technical data sheet

CLEAMEN 101/201

Volume: 550 ml
5 l

Product code: VC101005599
VC101050098

Product description:

A highly concentrated product designed for neutralizing odours and enhancing fragrance in the air or of a made up solution. It disintegrates odours and leaves a pleasant fresh fragrance identical to that of Cleaman 100/200's perfume.

Instruction of use:

It is especially designed for general and kitchen areas. When used in a washing solution it does not leave any oil stains and increases the perfume effects of the washing solution. This product can be used together with Cleamen blue and green series and also independently in water. During the application with the diffuser, the product does not stain the furniture or textiles and it also leaves a fragrance for a long time. The agent neutralizes any odours in textile materials and in the air.

It is suitable for perfuming a water washing solution, freshening the air by means of a diffuser and neutralizing odours in textile materials.

Apply by means of the diffuser in the area. We recommend using a pressurized diffuser for larger areas. Add in the bucket, during manual cleaning with a mop and a hand cart or a bucket.

level of fragrance
